

## **COAX CABLE**

#### TITLE:

SFX100 Coaxial Twin Premium

#### CODE:

SFX/100-TWIN-PVC-BLK-100

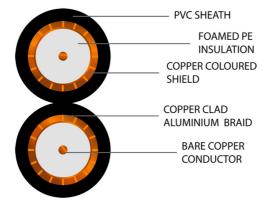

#### **DESCRIPTION:**

100m SFX100 Coaxial Twin Premium Black PVC

#### SUPPLIED AS:

Reel of 100m

- High frequency, low loss cable, designed to carry CCTV, TV and Satellite Signals
- · Manufactured with gas injected foam granting the cable a much better mechanical, electrical and ageing performance compared to a solid PE dielectric
- Polyvinyl chloride plastic has excellent aging properties and will usually exceed a 25-30 year service life
- This family of cable contains both a foil and braided screen, enhancing performance and reducing interference
- Improved performance and protection against fire

# **Product Specification**

#### **Cable Construction**

| Cable Construction       | Twin cables in shotgun configuration         |
|--------------------------|--|
| CPR                      | Eca  |
| Conductor Diameter (mm)  | 1.00 ±0.01                                   |
| Inner Conductor          | Bare Copper                                  |
| Overall Diameter (mm)    | 6.60 ±0.20                                   |
| Compliance and Standards | CE2014/30/EU,RoHS2 2011/65/EU,LVD 2014/35/EU |

#### Insulation

| Insulation                | Foamed PE  |
|---------------------------|------------|
| Insulation Colour         | White      |
| Insulation Thickness (mm) | 1.79 ±0.01 |

#### **Outer/Jacket Specification**

| Jacket                | PVC            |
|-----------------------|----------------|
| Overall Colour        | Black          |
| Overall Diameter (mm) | 6.60 ±0.20     |
| Jacket Colour         | Black RAL 9005 |
| Jacket Thickness (mm) | 1.23           |

#### **Electrical Characteristics**

| Outer Conductor DC resistance @ 20°C | <450/km       |
|--------------------------------------|---------------|
| Rated Temperature (°C)               | -20°C to 80°C |
| Impedance                            | 760 ±30       |
| Capacitance                          | >55 nF/km     |

### **MORE INFORMATION:**

| EURO                            | CLASSIFICATION CRITERIA   |   |   |   |    |  |    |  |
|---------------------------------|---|---|---|---|----|--|----|--|
| CLASS<br>(ca:cable)             | FIRE RATING   | SFX<br>COMMENT  |   | CPR GUII  | =  | E Sec  | ;L | ıri-Flex°  |
| Reaction to Fire BS EN ISO 1716 |   |   | SUBCLASSIFICATIONS FOR EUROCLASSES Bca to Dca |   |    |  |    |  |
| A <sub>ca</sub>                 | Does not contribute to the fire                                       | Due to availability, it will be almost impossible for a cable to meet Aca, so they should only be specified with extreme caution.   |   | SMOKE<br>RODUCTION  |    | D) FLAMING<br>DROPLETS   |    | A) SMOKE<br>CIDITY   |
| Reaction to Fire BS EN 50399    |   | BS EN 50399/BS EN 61034-2   |   | BS EN 50399   |    | BS EN 60754-2  |    |  |
| B1 <sub>ca</sub>                | Minimum contribution to the fire                                      | It's highly unlikely the commonly-used cables will be classified to Class B1ca.   |   | s1a: s1 + transmittance<br>>=80% (BS EN 61034-2)  |    | d0: No fall of droplets or flaming particles, times for 1200 seconds                     |    | a1: Very low acidity<br>(conductivity <2.5<br>uS/mm & pH >4.3) |
| B2 <sub>ca</sub>                | Combustible, low flame spread & heat release contribution to the fire | Similar to Class Cca, although a lower acceptable heat release rate and burn measurement. In practice, this is likely to be the highest class cables will meet.                                     |   | s1b: s1 + transmittance<br>>=60% <80% (BS EN<br>61034-2)  |    | d1: Fall of droplets or  |    | a2: low acidity  |
| Cca                             | Combustible,<br>moderate flame<br>spread & heat<br>release            | This is a more rigorous test than Class Dca, this is widely accepted across Europe as the 'go to' classification, but be aware, many cables do not meet Class Cca though availability is improving. |   | s1: Low production of slow<br>propagation of smoke<br>s2: Intermediate  |    | flaming particles that<br>persist for less than 10<br>seconds, timed for 1200<br>seconds |    | (conductivity <10<br>µS/mm & pH >4.3)                          |
| D <sub>ca</sub>                 | Combustible,<br>moderate flame<br>spread & heat<br>release            | This classification has relatively little use or acceptance within specifying/contracting organisations. This is because no large scale fire growth is measured.                                    |   | production & propagation of smoke s3: None of the above   |    | d2: None of the above  |    | d2: None of the above  |
| Reaction to Fir                 | e BS EN 60332-1-2   |   |   |   |    |  |    |  |
| E <sub>ca</sub>                 | Combustible, limited fire spread of less than 425mm                   | A basic test for vertical flame propagation for a single insulated wire or cable using a 1 kW pre-mixed flame. Note: This test does not measure heat release, toxic fumes or smoke.                 |   | Visit us onlin<br>www.securiflex  |    |  | K  | The Trusted Cable Brand  |
| F <sub>ca</sub>                 | Combustible, fire<br>spread of more than<br>425mm                     | Cables classified to Class Fca may have high levels of flammability due to the materials they are made of. This does not mean that the cable cannot be used, it is more likely to be used external. | M<br>Fo                                       | classes A to E have to be tested<br>fost cables will fall into classes<br>or a cable to meet Aca, B1ca,<br>actory audits. | B2 | 2ca to Eca.  |    | ,  |
