

### **ALARM CABLE**

#### TITLE:

Alarm Type 1 Copper LSZH

#### CODE:

SFX/6C-TY1-LSZH-WHT-100

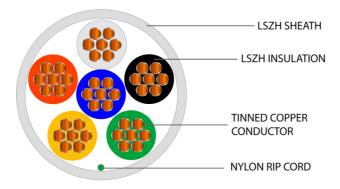

#### **DESCRIPTION:**

100m 6 Core Type 1 Alarm White LSZH

#### SUPPLIED AS:

Reel of 100m

- Generally used for connecting alarm equipment such as sensors, control panels and other low voltage circuits
- This cable is ROHS compliant
- Low smoke zero halogen plastic is good for use inside public buildings and spaces as will not emit toxic gases if the cable catches fire
- A premium alarm cable conforming to BS4737
- Improved performance and protection against fire

## ALARM CABLE

# Product Specification ( CP

#### **Cable Construction**

| Cable Construction       | 6 Cores                           |
|--------------------------|-----------------------------------|
| CPR                      | Eca                               |
| Conductor                | Tinned Copper                     |
| Conductor Diameter (mm)  | 0.19 ±0.008 x 7                   |
| Stranded Diameter (mm)   | 0.22                              |
| Overall Diameter (mm)    | 4.00 ±0.200                       |
| Compliance and Standards | BS4737-3.30:2015,RoHS2 2011/65/EU |

#### Insulation

| Insulation                  | LSZH                              |
|-----------------------------|-----------------------------------|
| Insulation Colour           | Red,Black,Blue,Yellow,Green,White |
| Insulation Resistance @20°C | >200 MO/km                        |
| Insulation Thickness (mm)   | 0.21                              |

#### **Outer/Jacket Specification**

| Jacket                | LSZH           |
|-----------------------|----------------|
| Overall Colour        | White          |
| Overall Diameter (mm) | 4.00 ±0.200    |
| Jacket Colour         | White RAL 9003 |
| Jacket Thickness (mm) | 0.5            |
| Nylon Rip-Cord        | Green 210D     |

#### **Electrical Characteristics**

| Insulation Resistance @20°C        | >200 MO/km    |
|------------------------------------|---------------|
| Max Conductor DC resistance @ 20°C | 100O/km       |
| Rated Temperature (°C)             | -40°C to 70°C |
| Rated Voltage (V)                  | 30V           |

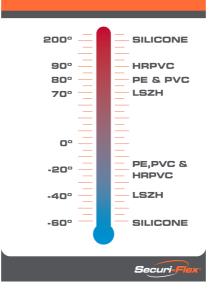

## S ALARM CABLE

#### **MORE INFORMATION:**

| EURO                         | CLASSIFICATION CRITERIA   |   |  |   |  |  |  |                                       |
|------------------------------|---|---|--|---|--|--|--|---------------------------------------|
| CLASS<br>(ca:cable)          | FIRE RATING   | SFX<br>COMMENT  |  | CPR GUIDE Securi-Flex   |  |  |  |                                       |
| Reaction to Fir              | e BS EN ISO 1716  |   | s  | UBCLASSIFICATIONS   | 3 F  | FOR EUROCLASSES  | 3 E  | Sca to Dca                            |
| A <sub>ca</sub>              | Does not contribute to the fire                                       | Due to availability, it will be almost impossible for a cable to meet Aca, so they should only be specified with extreme caution.   |  | SMOKE<br>RODUCTION  |  | D) FLAMING<br>DROPLETS   |  | A) SMOKE<br>CIDITY                    |
| Reaction to Fire BS EN 50399 |   | BS EN 50399/BS EN 61034-2   |  | BS EN 50399   |  | BS EN 60754-2  |  |                                       |
| B1 <sub>ca</sub>             | Minimum contribution to the fire                                      | It's highly unlikely the commonly-used cables will be classified to Class B1ca.   | s1a: s1 + transmittance<br>>=80% (BS EN 61034-2) |   | d0: No fall of droplets or flaming particles, times for 1200 seconds |  | a1: Very low acidity<br>(conductivity <2.5<br>uS/mm & pH >4.3) |                                       |
| B2 <sub>ca</sub>             | Combustible, low flame spread & heat release contribution to the fire | Similar to Class Cca, although a lower acceptable heat release rate and burn measurement. In practice, this is likely to be the highest class cables will meet.                                     |  | s1b: s1 + transmittance<br>>=60% <80% (BS EN<br>61034-2)  |  | d1: Fall of droplets or  |  | a2: low acidity                       |
| Cca                          | Combustible,<br>moderate flame<br>spread & heat<br>release            | This is a more rigorous test than Class Dca, this is widely accepted across Europe as the 'go to' classification, but be aware, many cables do not meet Class Cca though availability is improving. |  | s1: Low production of slow<br>propagation of smoke<br>s2: Intermediate  |  | flaming particles that<br>persist for less than 10<br>seconds, timed for 1200<br>seconds |  | (conductivity <10<br>µS/mm & pH >4.3) |
| D <sub>ca</sub>              | Combustible,<br>moderate flame<br>spread & heat<br>release            | This classification has relatively little use or acceptance within specifying/contracting organisations. This is because no large scale fire growth is measured.                                    |  | production & propagation of smoke s3: None of the above   |  | d2: None of the above  |  | d2: None of the above                 |
| Reaction to Fir              | e BS EN 60332-1-2   |   |  |   |  |  | 0  |                                       |
| E <sub>ca</sub>              | Combustible, limited fire spread of less than 425mm                   | A basic test for vertical flame propagation for a single insulated wire or cable using a 1 KW pre-mixed flame. Note: This test does not measure heat release, toxic fumes or smoke.                 |  | Visit us onlin<br>www.securiflex  |  |  | K  | The Trusted<br>Cable Brand            |
| F <sub>ca</sub>              | Combustible, fire<br>spread of more than<br>425mm                     | Cables classified to Class Fca may have high levels of flammability due to the materials they are made of. This does not mean that the cable cannot be used, it is more likely to be used external. | M<br>Fo  | lasses A to E have to be tester<br>lost cables will fall into classes<br>or a cable to meet Aca, B1ca,<br>ctory audits. | B2   | Žca to Eca.  |  | *                                     |
