

### **NETWORK CABLE**

#### TITLE:

Cat6 4pr F/UTP SWA LSZH

#### CODE:

SFX/C6-F-UTP-SWA-LSZH-BLK-500

#### **DESCRIPTION:**

500m Category 6 4pr F-UTP SWA Black LSZH

#### **SUPPLIED AS:**

Reel of 500m

- Capable of 1000mbps transfer speed or 250mhz frequency at a maximum distance of 90 meters
- Screened for use where RF or Power equipment may produce electromagnetic interferance. This is also a security measure should eavesdropping be apparent.
- Low smoke zero halogen plastic is good for use inside public buildings and spaces as will not emit toxic gases if the cable catches fire
- Provides mechanical protection against cable being pinched or pierced

# NETWORK CABLE

## **Product Specification**

#### **Cable Construction**

| CPR                     | Fca         |
|-------------------------|-------------|
| Conductor               | Bare Copper |
| Conductor Diameter (mm) | 0.54 ±0.020 |
| Overall Diameter (mm)   | 11.20 ±0.20 |

#### Insulation

| Insulation                | HDPE  |
|---------------------------|---|
| Insulation Colour         | Blue/White/Blue;Orange/White/Orange;Green/White/Green;Brown/White/Brown |
| Insulation Thickness (mm) | 0.26  |

#### **Outer/Jacket Specification**

| Outer Jacket                | LSZH           |
|-----------------------------|----------------|
| Inner Jacket                | LSZH           |
| Inner Jacket Colour         | Grey RAL 7004  |
| Inner Jacket Diameter (mm)  | 7.80 ±0.20     |
| Inner Jacket Thickness (mm) | 0.80 ±0.10     |
| Overall Colour              | Black          |
| Overall Diameter (mm)       | 11.20 ±0.20    |
| Jacket Colour               | Black RAL 9005 |

#### **Electrical Characteristics**

| Max Conductor DC resistance @ 20°C | <102.40O/km   |
|------------------------------------|---------------|
| Rated Temperature (°C)             | -40°C to 70°C |

## **NETWORK CABLE**

### **MORE INFORMATION:**

| EURO                            | CLASSIFICATION CRITERIA   |   |   |  |   |  |    |  |
|---------------------------------|---|---|---|--|---|--|----|--|
| CLASS<br>(ca:cable)             | FIRE RATING   | SFX<br>COMMENT  |   | CPR GUII   | 3 | E Sec  | ;L | ıri-Flex°  |
| Reaction to Fire BS EN ISO 1716 |   |   | SUBCLASSIFICATIONS FOR EUROCLASSES Bca to Dca   |  |   |  |    |  |
| A <sub>ca</sub>                 | Does not contribute to the fire                                       | Due to availability, it will be almost impossible for a cable to meet Aca, so they should only be specified with extreme caution.   |   | SMOKE<br>RODUCTION   |   | D) FLAMING<br>DROPLETS   |    | A) SMOKE<br>CIDITY   |
| Reaction to Fire BS EN 50399    |   | BS EN 50399/BS EN 61034-2   |   | BS EN 50399  |   | BS EN 60754-2  |    |  |
| B1 <sub>ca</sub>                | Minimum contribution to the fire                                      | It's highly unlikely the commonly-used cables will be classified to Class B1ca.   |   | s1a: s1 + transmittance<br>>=80% (BS EN 61034-2)   |   | d0: No fall of droplets or flaming particles, times for 1200 seconds                     |    | a1: Very low acidity<br>(conductivity <2.5<br>uS/mm & pH >4.3) |
| B2 <sub>ca</sub>                | Combustible, low flame spread & heat release contribution to the fire | Similar to Class Cca, although a lower acceptable heat release rate and burn measurement. In practice, this is likely to be the highest class cables will meet.                                     |   | s1b: s1 + transmittance<br>>=60% <80% (BS EN<br>61034-2)                                   |   | d1: Fall of droplets or  |    | a2: low acidity  |
| Cca                             | Combustible,<br>moderate flame<br>spread & heat<br>release            | This is a more rigorous test than Class Dca, this is widely accepted across Europe as the 'go to' classification, but be aware, many cables do not meet Class Cca though availability is improving. |   | s1: Low production of slow propagation of smoke  s2: Intermediate production & propagation |   | flaming particles that<br>persist for less than 10<br>seconds, timed for 1200<br>seconds |    | (conductivity <10<br>µS/mm & pH >4.3)                          |
| D <sub>ca</sub>                 | Combustible,<br>moderate flame<br>spread & heat<br>release            | This classification has relatively little use or acceptance within specifying/contracting organisations. This is because no large scale fire growth is measured.                                    |   | of smoke s3: None of the above   |   | d2: None of the above  | l  | d2: None of the above  |
| Reaction to Fir                 | e BS EN 60332-1-2   |   |   |  |   |  | _  |  |
| E <sub>ca</sub>                 | Combustible, limited fire spread of less than 425mm                   | A basic test for vertical flame propagation for a single insulated wire or cable using a 1 KW pre-mixed flame. Note: This test does not measure heat release, toxic fumes or smoke.                 |   | Visit us onlin<br>www.securiflex   |   |  | K  | The Trusted Cable Brand  |
| F <sub>ca</sub>                 | Combustible, fire<br>spread of more than<br>425mm                     | Cables classified to Class Fca may have high levels of flammability due to the materials they are made of. This does not mean that the cable cannot be used, it is more likely to be used external. | Classes A to E have to be tested by an independent authorised laboratory. Most cables will fall into classes B2ca to Eca. For a cable to meet Aca, B1ca, B2ca or Cca, there also needs to be regular on-going factory audits. |  |   |  |    | ,  |
