

**TITLE:**

EV C5 FTP

CODE:

SFX/EV-3C-6.0-ULTRA-C5-FTP-PVC-BLK-U-1

DESCRIPTION:

1m (per metre) EV Ultra 3 x 6mm plus Cat 5 FTP PVC Black

SUPPLIED AS:

Per 1m Lengths

- Data and power cables combined into one
- Requires less storage space
- Easier to work with
- Can be routed through walls and buildings easier
- Quicker to install
- Clean and tidier finish on installation

Product Specification

Cable Construction

| | |
|-----------------------|-----------------------|
| Cable Construction | Flex |
| CPR | UK |
| Conductor | Plain Annealed Copper |
| Conductor 2 | Bare Copper |
| Overall Diameter (mm) | 16mm |

Insulation

| | |
|-------------------|-------------------------|
| Insulation | Thermosetting XLPE |
| Insulation Colour | Brown;Blue;Green/Yellow |

Outer/Jacket Specification

| | |
|-----------------------|----------------|
| Outer Jacket | CarbonTek® |
| Overall Colour | Black |
| Overall Diameter (mm) | 16mm |
| Jacket Colour | Black RAL 9005 |

Electrical Characteristics

| | |
|------------------------|---------------|
| Rated Temperature (°C) | -15°C to 90°C |
|------------------------|---------------|

**MORE INFORMATION:**

| EURO CLASS (ca: cable) | CLASSIFICATION CRITERIA | | CPR GUIDE | |
|----------------------------------|---|--|---|---|
| | FIRE RATING | SFX COMMENT | | |
| Reaction to Fire BS EN ISO 1716 | | | SUBCLASSIFICATIONS FOR EUROCLASSES B _{ca} to D _{ca} | |
| A_{ca} | Does not contribute to the fire | Due to availability, it will be almost impossible for a cable to meet A _{ca} , so they should only be specified with extreme caution. | (S) SMOKE PRODUCTION | (D) FLAMING DROPLETS |
| Reaction to Fire BS EN 50399 | | | BS EN 50399/BS EN 61034-2 | BS EN 50399 |
| B1_{ca} | Minimum contribution to the fire | It's highly unlikely the commonly-used cables will be classified to Class B1 _{ca} . | s1a: s1 + transmittance >=80% (BS EN 61034-2) | d0: No fall of droplets or flaming particles, times for 1200 seconds |
| B2_{ca} | Combustible, low flame spread & heat release contribution to the fire | Similar to Class C _{ca} , although a lower acceptable heat release rate and burn measurement. In practice, this is likely to be the highest class cables will meet. | s1b: s1 + transmittance >=60% <80% (BS EN 61034-2) | d1: Fall of droplets or flaming particles that persist for less than 10 seconds, timed for 1200 seconds |
| C_{ca} | Combustible, moderate flame spread & heat release | This is a more rigorous test than Class D _{ca} , this is widely accepted across Europe as the 'go to' classification, but be aware, many cables do not meet Class C _{ca} though availability is improving. | s1: Low production of slow propagation of smoke | a1: Very low acidity (conductivity <2.5 μS/mm & pH >4.3) |
| D_{ca} | Combustible, moderate flame spread & heat release | This classification has relatively little use or acceptance within specifying/contracting organisations. This is because no large scale fire growth is measured. | s2: Intermediate production & propagation of smoke | a2: low acidity (conductivity <10 μS/mm & pH >4.3) |
| Reaction to Fire BS EN 60332-1-2 | | | s3: None of the above | d2: None of the above |
| E_{ca} | Combustible, limited fire spread of less than 425mm | A basic test for vertical flame propagation for a single insulated wire or cable using a 1 KW pre-mixed flame. Note: This test does not measure heat release, toxic fumes or smoke. | Visit us online: www.securiflex.co.uk The Trusted Cable Brand | |
| F_{ca} | Combustible, fire spread of more than 425mm | Cables classified to Class F _{ca} may have high levels of flammability due to the materials they are made of. This does not mean that the cable cannot be used, it is more likely to be used external. | Classes A to E have to be tested by an independent authorised laboratory. Most cables will fall into classes B2 _{ca} to E _{ca} . For a cable to meet A _{ca} , B1 _{ca} , B2 _{ca} or C _{ca} , there also needs to be regular on-going factory audits. | |
